

Dear FCC: Please use your wisdom and reject NAB's petition 04-160. Satellite Radio offers services and quality that is not found in many communities, and I feel that any attempt to prevent Satellite Radio from offering local services such as traffic and weather reports would be wrong. The National Association of Broadcasters should spend their time and energies improving the product they offer rather than trying to deny products and services to others. Thank you for your attention to this matter.

Sincerely,

Charlie Jackson
